COMMERCIAL FERTILIZERS.

What to Buy

That Commercial Fertilizers are essential to the successful production of crops can no longer be questioned. This has been settled by actual experience of the most successful farmers North and South, as well as upon the highest scientific authority.

The question therefore for the consideration of the farmer is, what to buy, in the shape of manure

The answer to this question is: What has stood the test? What guano stands before the farmers of North Carolina as a practical success? We answer, the

Pine Island Ammoniated Phosphate.

That it is a success we have certificates from leading farmers in every section where it has been used—men who have used Commercial Manures for years and make money by it.

We don't dare say it does not pay to make manure at home. It does pay. And no one can be successful in farming unless he makes manure. When he has made all the manure possible the deficiency must be supplied by commercial Fertilizers, for no one who cultivates cotton for profit (and that is the only profitable crop that can be raised in our section) can make on his farm a sufficiency of manure for his crops.

We offer the Pine Island Guano to supply this deficiency, in the fullest confidence that it is the best and cheapest fertilizer sold in the State.

We have arrangements for supplying it in any quantity, in good strong sacks, so that it can be transported any distance without loss

The season for planting is now nearly at hand and we hope to receive all orders early so that they can be booked for immediate shipment from the Rail Road Warehouse thus saving the expense of drayage and handling.

Most Respectfully,
M T. LEACH & CO.

We desire to establish agencies at all the principal Rail Road Stations in the cotton section.

With good reliable agents satisfactory terms will be made.

Quiet a good sum was realized for the benefit of that deserving charity, the Hospital of St. John's Guild.

KITE FLYING AND ITS RESULTS.—Dear to the heart of the youth is the sport of kite flying, as is evidenced by the numbers who may be daily seen in this breezy weather, engaged thereat. But however delightful it may be and apparently harmless, there are some results which lead us to fancy it a dangerous pastime in some places are the streets of the city. Yesterday a sedate farmer drove his wagon in, with his family therein. When he reached Blount street the horse, at home a staid animal, became very frisky and pretty soon started off at speed. Reined in, the horse began to kick with might and main, and ceased not until he had utterly wrecked the front portion of the wagon and badly injured himself. This result was produced by the appearance of a kite, which a careless boy was flying right in the street. The ladies in the wagon were frightened and one was hurt in jumping out. Now this is a danger which impends daily on the streets, and should be stopped. The matter is now left to the police to look after.

New and Unheard Of!

Those unique cards. Just received at the News Job Office. The marvel of the age. *

JAIL BIRDS.—The pleasant society of the jail yesterday received four additions, which make the whole number of prisoners therein at present sixteen. Of the quartette who went in yesterday, two were Wash Harrison and Prince Jones, africans, sent up by the mayor for the common crime of larceny; while the others were Lonny Tompkins, black, put in by U. S. Marshal Hill, for counterfeiting; and Sion Phillips white, for the double crime of larceny and forgery, put in by the Mayor. The last party is somewhat noted as a forger several charges standing against him, he having victimized some half dozen citizens here. He was caught in an attempt to pass a forged check on the State National Bank and, and so comes to grief.

Receipts for week ending February 21st, 1879,	847 bales.
Receipts for same week last year,	652 "
Increase in receipts for week this year,	195 "
Receipts for same week in 1877,	617 "
Whole receipts since 1st Sept. to date,	39,504 "
Whole receipts same time last year,	36,924 "
Increase in receipts this year to date,	2580 "

Owing to the very bad and almost impassable condition of the country roads our receipts have not been as large as last week, but it is gratifying to see that there is a steady increase each week, which now points to 50,000 bales as our whole receipts for the year. The market has been steady and closed at 9c for middling.

The report was ordered to be printed and transmitted to the House.

CALENDAR.

The Senate proceeded to the consideration of the following bills, which were disposed of as indicated:

House bill to fund the debt of Craven county and to authorize the issue of bonds passed third reading.

Senate bill to authorize the commissioners of Onslow to issue bonds passed second reading and went to the calendar.

WASHINGTON'S BIRTHDAY.

Mr. Bryan, of Duplin, moved that in respect to the memory of George Washington the Senate do now adjourn.

Mr. Mebane, half of the day being already spent in work, moved as more appropriate that the State Treasurer be authorized to pay to Mrs. Letitia Walker, of Rockingham, the sum of $50, for the erection of a memorial of arms of North Carolina for Mount Vernon. Mr. Mebane eloquently urged this amendment. Nearly every other State in the Union had its coat of arms in the classic home of Washington—a call had been made upon the distinguished representative of our State in the Mount Vernon Association (Mrs. Walker) to fill the blank left for North Carolina; and he trusted there was not a man in the General Assembly who would fail to respond to this call.

Mr. Dillard feelingly and eloquently supported the amendment of Mr. Mebane and it was adopted by acclamation, and sent to the House for concurrence.

Cape Fear and Deep River Navigation Company.

Correspondence of the News.

While commending the manly bearing of your correspondent, "Truth," I would correct some of the errors into which I suppose he has unconsciously fallen.

1st. The party named did not buy the State's interest in the navigation works One of the incorporated companies before referred to, bought a portion of the work on the conditions named by "Truth." But this does not affect their title to other portions of the river, or other titles to that portion; nor is the sum named, by any means, all that has been paid for this work as "Truth" will learn by referring to the records of his own county.

3d. He might also learn by application to the representatives of the company in his county, that while the managers have spent nearly half a million in iron, and other works, in his, and adjoining counties, they have spent less than one hundred thousand dollars on the improvement of the river; not one third of the amount he states.

He will also learn from the same source that although a pair of gates are broken, it would require less than one thousand dollars to put in order for use, the 50 miles or more of the work which they rebuilt. He will learn too, that while the company's works are now comparatively idle, they have no intention of abandoning this great enterprise, nor have they ever, from the first, stood in the way of its completion by others.

"Tear out the dams and let the shad come up." How does that sound in a State where enterprise and progress begins to dawn, and where they are constantly calling for cotton and other manufacturers to come and develop their water powers? Does "Truth" know that at one point on the Cape Fear, far away from transportation, except such as the river may give, there is forty per cent more waterpower than at Lowell or Lawrence, Mass., and that one of these towns has a population of forty thousand, and the other thirty thousand who are almost exclusively engaged in the manufacture of cotton, although eight hundred miles away from the fields where it is grown? And does he know that just at this time, English manufacturers are looking to these southern waterpowers, as a suitable point around which to build up cotton factories. And that there is enough idle power on these two rivers, to turn five times as much machinery as there is in Lowell?

If "Truth" will take time to investigate the "plain facts," he will be astonished to find that these powers, which are quite equal to these which made Richmond, Va. a city, should have remained unused, and would be convinced, that ere long the busy hum of machinery will be heard, where now there is only the incessant roar of a mighty power of unemployed wealth, waiting to be harnessed and made yield as income greater than that required to run the machinery of the State Government, even before the retrencher's axe began to hew.

No Mr. "Truth" you are very much mistaken if you suppose the people want this work stopped. No doubt there are certain individuals, and perhaps corporations, that would spend both time and money to prevent the opening of so cheap an outlet to our coast, for our own freights. Not so with a people who have enjoyed the outlay of large sums of money among them by miners and manufacturers, and who have State pride enough to desire to see their own coast towns build up, and their own natural advantages improved.

JUSTICE.

A Disgraceful Sham.

New York Sun.

From first to last this whole proceeding has been a disgraceful sham, unworthy the name of an investigation, and conducted in a manner to hide the truth from the public, and to save Matthews from the penalty of his criminal collusion. Hayes, Evarts, Harlan, and Matthews appear far worse than Anderson does, for they were all concerned in prostituting the public patronage to reward a fraud of which they were distinctly informed, and to silence the tongue of an informer who threatened exposure to villainy.

The Wife of Brignoli Secures a Divorce.

In the Supreme Court of New York city, Saturday, the wife of Brignoli, the tenor, was granted a divorce from her husband, on the allegation that he had during the year 1878 broken his marriage vows on several occasions. Mrs. Brignoli was a South Carolinian by birth, a Miss Sallie Isabella McCullough by name, of excellent family, and a singer by occupation, and was married to Brignoli in Canada in 1870. As Brignoli's farewell concert and benefit took place in New York on Friday last, so that he might take Saturday's steamer for London, it was deemed desirable to have the decree signed and serve on Saturday. Therefore it was done. It is Brignoli's intention to remain across the waters. Mrs. Brignoli resumes henceforth the freedom as well as the name of her maidenhood.

A Gloomy View.

Chicago Times.

For all purposes of national politics the colored vote would seem already to have been well-nigh eliminated. It fails to secure recoguition even as an "element" to be conciliated, and seems lacking in leaders of sufficient ability to secure such recognation. Without that the colored people will be subjects of such encroachment in their unequal contest to maintain their place in the social and political order as will practical nullify their votes and reduce them to seridom. In that contest, which is the struggle of civilization, they must take their chances; and the chances seem so much against them that it must be reckoned among the possibilities that within comparatively few generations the African race in this country will be extinct.

Not the Most Popular Candidate

Savannah News.

As far, then, as the Southern States are concerned, it is safe to say that Mr. Tilden is not, by any means, the most popular candidate for the presidency who could be presented in 1880; since he is, to a great degree, regarded here as having timidly abandoned us to the Radicals in 1876. If this idea is hereafter removed by a better knowledge of the facts as they existed, the sense of justice to him as one cheated of his office by fraud, bribery, and a traitorous conspiracy, and then as one who had been basely maligned and villified by his political enemies as the impersonation of democracy, must tell in his favor. And if the national democracy, in convention assembled, believe that these latter reasons for his nomination outweigh all others, then the South will accord him once more an undivided support.

DAILY NEWS

SUNDAY, FEBRUARY 23, 1879.

HUSSEY & JORDAN, Prop's.

JOHN B. HUSSEY, - Editor.

Can the People Stand It.

The public need not be told that the NEWS is a staunch friend of Internal Improvements. Its entire record proves that fact. It however seriously doubts the propriety of extending large aid to railroad corporations out of the public monies in a time of deep financial distress such as now oppresses the whole State.

How much is now being collected by the tax-collectors for railroad aid under the present laws the following table will show:

WESTERN N. C. R R.

Appropriation to buy iron &c., per annum.	$70,000
Appropriation to pay interest on 1st Mortgage Bonds,	59,500
Paid to feed, clothe and guard 500 convicts per annum,	49,000
	$178,500

Five hundred and seventy eight thousand dollars in cash out of the public treasury is the cost to the taxpayers annually of the work now being done on the Western N. C. Railroad besides the value of the labor of 500 able bodied convicts. It is true the State is to have a claim against the road for this expenditure, but as it comes in subject to a mortgage of $850,000 already on the road, the interest on which mortgage the State is annually compelled to pay, it is easy to see that this advance of so large a proportion of the State revenues is little else than a gratuity. If on the contrary the State has any real interest in the road, it may be questioned if in such times as these it would not be better to mortgage such interest and build the rest of the road with the proceeds of the mortgage bonds instead of out of the Public Treasury.

THE CAPE FEAR AND YADKIN VALLEY R R.

The bill to consolidate the Western (Coalfields) Railroad by which 51 miles of completed road in which the State owned a four-fifths interest was consolidated with over 200 miles of road only existing on paper passed the Senate Friday night by the casting vote of the President, Mr. Robinson.

This bill gives the new road which is styled the Cape Fear and Yadkin Railroad, an appropriation of $50,000 out of the Treasury and the State is to feed, clothe and guard 750 convicts for it besides. The expenses of which to the State at the same rate of the Western North Carolina Railroad convicts will be—

Appropriation	$50,000
Feeding, clothing and guarding 750 convicts	74,000
Total,	$124,000

It is true there are now only 1,100 convicts in the penitentiary and the Western North Carolina Railroad has the first preference for 500. The 750 must therefore be filled up to its full limit by consignments yet to be made by the Judges on the Spring Ridings. It is sufficient however to show how much the bill calls for.

The two appropriations combined now call for—

Western N. C. R. R.	1879,	$178,500
Cape Fear & Yadkin R. R.	"	124,000
		$304,500
Western N. C. R. R.	1880,	178,500
Cape Fear & Yadkin R. R.	"	74,000
		$252,500

This makes a grand total of $556,000 voted to be taken out of the Treasury in cash between now and the meeting of the next General Assembly for these two railroads, besides the autual value of the labor of 1,250 convicts, who if farmed out as in other States, would otherwise bring money into the Treasury to reduce taxation.

It is very clear that at a moderate computation the appropriations under these two bills would approximate 600,000 six hundred thousand dollars in the next two years, including the price at which the State could hire her convicts out.

Admitting for the argument that the State is really getting a valuable security for this large amount of taxes the question presents itself, does the financial condition of the people render it advisable. Does the previous experience of North Carolina in her railroad investments justify the collection of so large an amount of taxes to be risked in this mode at this time.

To give an idea of how the burden will bear, the cost to a few counties is cited: Wake pays $28,000 into the State Treasury. Of this about, nearly one-third or $9,000 is the sum she sends as her annual tribute to the Western N. C. R. R. To this is now to be added $6,000 more as her part of the Cape Fear & Yadkin Railroad appropriation if the bill as passed Friday night is carried out to the extent it allows of 750 convicts.

Mecklenburg contributes annually over $6,000 towards building the Western N. C. R. R. To this is now to be added about $4,000 to the C. F. & Y. R. R.

Halifax pays nearly $4,000 annually towards building the Western N. C. R. R., and now has to add $3,000 for the new road.

Orange is taxed over $3,000 per annum for the Western N. C. R. R., and has now to add nearly $2,000 for the new road.

And so on for other counties. Either the new bill cannot be enforced or the above are the additional burdens.

How can the counties carry on their county governments if the above sums, besides the expenses of the State Government and the charitable institutions are to be taken out and the counties are only left for home purposes the balance that remains under the constitutional limit of taxation.

As matter deserves the careful consideration of the Legislature, the people and the press.

The News has no interest whatever in the premises except its devotion to the party and the public. It will vouch for the accuracy of these figures if the bills stand as they are. The figures for the Western N. C. R. R. are taken from the Governor's message and the act appropriating the money. The figures for the other road are based upon the act and upon the cost of the convicts upon the Western N. C. R. last year.

The News is anxious to see both roads built. It is desirous to see North Carolina chequered with railroads.

The questions it asks are:

Can the people stand these heavy railroad appropriations at this time?

Can the party stand it?

What will the men who have to dig this large amount of taxes out of the ground say about it?

The Insurance Bill Again.

The views which we have seen expressed on the merits of the 1st. and 2nd. sections of House Bill entited an Act to Regulate Fire Insurance, in North Carolina encites surprise in the minds of intelligent underwriters, and is calculated to mislead a certain class, who invariably sneeze when their adversaries "take snuff." At no little cost of time and trouble, our insurance agents had convinced a majority of the committee on Insurance and many members of the Legislature that the passage of the bill would force our home and the foreign companies doing business in this State to cancel existing policies and clan business, thus depriving the State of an income of $15,000 and that upwards of $100,000, now paid by insurance companies for agency expenses, rents, advertising, attorney's fees, etc., spent in the State would be no longer enjoyed, that evil and only evil, would result from the passage of the bill, and our citizens would be compelled to have their insurance placed in distant States under their laws, at increased cost, delay and inconvenience. For these reasons, there was no longer any concern felt in insurance circles and agents from other cities in our State returned home believing the bill would not pass, but the article referred to opens the question again and carries anxiety. If our law makers would or could read the policy of every company in the civilized world, they would see that a fire insurance policy only indemnifies the assured to the amount of the policy for loss or damage sustained to property insured immediately preceding the fire and not when the policy was written, moreover, no agent being authorized to cancel or charge the printed conditions of a policy without the consent of the company, the passage of such a law would be inopperative?

It has been shown from the books of the Secretary of State, that in 1874 there were 72 companies doing business in this State that because of the large amount lost by fire 26 retired, leaving in 1877, (a year remarkable for exemption from loss by fire,) but 46 companies who paid for losses and expenses for $105 for every $100 received in premiums. The tables for 1878 have not been as yet completed, but it being an unprecedented year for losses by fire the companies lost fearfully and thirteen withdrew their agencies.

For these reasons, we sincerely hope the present laws will not be changed in any respect and thus induce the companies now doing business in our State to remain and have a chance to recover the losses they have incurred by the more conservative rules taught by sad experience, and now practiced.

We have been favored with the following table of contents of Col. Polk's forthcoming hand book of North Carolina.

PART I

Department of Agriculture, Historical sketch of the State from 1584 to 1879, list of Executive and State officers from 1663 to 1879, historical and descriptive sketches of each county, partial list of the native North Carolinians who have become prominent citizens of other States, list of native inventors.

PART II.

Geological and mineralogical sketch of the State.

PART III.

Political condition of the State (showing our mode of government, system of labor and taxation, industries, climate, healthfulness, general laws affecting the people, etc.)

PART IV.

Sketch of public institutions, public institutions, sketch of principal literary institutions, public schools, State press, tabulated statement of farm products, tabulated statement of general statistics, cotton and wool factories, agricultural organizations, extracts from correspondents, showing productive capacity of soils in various counties with notes on improved stock, cities towns, villages, (giving location—on navigable streams or railroad, or seat, or distance from same, bearings from county seats, estimated number of inhabitants, &c. Silk culture, native medical herbs and roots, fruits adapted to our climate and soils, grapes, wines, bee keeping, fishing interests, lines of transportation in the State.

The Handbook will be laid before the people in a very short time, and will contain about 320 pages. Not only will people abroad be enabled to get concise and definite information of the wealth and attractions that our State afford, but the researches made by the Department officials will enable them to bring to light many facts relative to our State which were never before published. This will be a valuable work and will lead our people to a closer examination into our own resources and capabilities. In the hands of the youth and children of the land it will supply a long felt need in giving them the history and condition of our State in a brief and accurate summary.

What Have They Done?

We are asked daily, "What has the Legislature done?" A careful reading of the proceedings obliges us to answer, practically nothing, except grant a heavy railroad appropriation and cut down the price of the public printing. The time has been been consumed in introducing bills and resolutions, with nothing of real public benefit disposed of. Already two-thirds of the allotted time has passed, and still new business is getting on the calendar!

CANADA proposes to change its policy with respect to immigration. Almost any friend of the government who wanted a trip to Europe has been commissioned an immigration agent in days gone by, and had his expenses paid. Canada was pictured as a paradise of milk and honey, to the unfortunates on the other side, who were further persuaded to make it their home by having part of their passage paid. But the Montreal Star complains that the best of the arrivals finally crossed to this side of the line, so that Canada lost money and swelled her indigent population with the refuse immigrants that remained to her. The agents in Great Britain and Ireland are now to be recalled, and what further advertising the country needs is to be done by printer's ink.

The Tennessee Legislature shaved $1,000 from the salaries of the Governor and supreme court judges and docked the inferior judges $500 each.

Minister Welsh sends home an appeal for more salary. The sugar business is dull, we believe. The country expects its minister at London to stand it as long as he can on $17,500 and then come back home. That sum ought to pay the bills of a year in London in modest respectability.

The learned State of Massachusetts has the largest debt of any of the States. Alabamba, Virginia, North Carolina, New York, Tennessee, Pennsylvania and Louisiana come in the order named so far as debt is concerned, and each of them owes more than $20,000,000. West Virginia, Missouri, Georgia and Arkansas come next in order, and each are in debt over $10,000,000. Michigan is a fortunate State, having less than $1,000,000 of debt hanging over her. The total amount of debt owed by States aggregates $345,197,000.

THE Khedive of Egypt is in trouble. He has accumulated all the money possible by onerous taxation and foreign loans, and right royally has he spent it. One of his luxuries took the shape of an expensive army, with European appointments. Now that he has reached the bottom of his purse, he finds it necessary to disband it, and that without paying the officers and men. There has already been a riot in Cairo from this cause, in which one of his ministers was shot and another roughly handled. It is feared there may be further troubles, and that the Khedive may be chawed up by his own army.

It is stated that the President has tendered the position of Envoy Extraordinary and Minister Plenipotentiary to the German empire, made vacant by the death of Bayard Taylor, to the Rev. Joseph Parrish Thomas, D. D., an eminent Congregationalist divine, archaeologist and orientalist, who has already been residing in Berlin since 1873. Dr. Thompson was born in Philadelphia in 1819, the son of a merchant of that city.

Minister Kasson, writing from Vienna, says that the Russian plague excites great alarm in Germany, Austria and Hungary, that nearly all the patients have died, and that six army surgeons and nearly all who come in contact with the dead have died, although disinfectants were freely used. The mortality among the sick in some places was equal to one hundred per cent.

THE Agricultural interest of the State control $82 000,000, of the money matters of the State and the other interests control $178,000,000. (Extract from Col. Polks speech 18th inst. This is good for reflection. Who builds the Railroads and Public Institutions of the State? The farmers and none know this fact better than they. However any museum impairing their ability to need their demands will be scanned very closely.

BILLS to create new townships are a useless consumption of Legislative time. Boards of County Commissioners in each county already have that authority and judge better of the necessity. All such bills should be tabled.

A Fence Law.

Correspondence of the News.

MT. AIRY, SURRY CO., N. C., February 19, 1879.

Many reasons are given for a fence law, It saves timber, it is agued, and prevents drought. Does the cutting of timber cause drought? It seems to be the universal belief that it does. If so, it is a very important question; this fact seems to have been proven here last summer and fall. I noticed on the Blue Ridge that one locality had much more rain than any of the other portions within the broad sweep of mountain view, say too miles. This rainy locality was at and near Fisher's Peak. One time, I remember, clouds were seen to fall in heavy showers exclusively here, all the time of two days. At one time the rain was more severe, also here, and tore out a large tract of earth, hurling large rocks and trees and crushing the latter to splinters. The cause, since this snow has fallen, is more apparent than ordinarily. The farms on the mountains are very plainly seen now glittering in the sun. The outlines of the cleared are distinctly marked. Around Fisher's peak, where so much rain fell, there are no farms or scarcely any snow to be seen. But for the acorns and chesnuts which support a tough, lean, thin animal, somewhat resembling a civilized hog, it would be possible, it seems to me, to have a no fence law in every county. This would save timber and promote the improving of the lands to a large extent, especially if that still more important law called the dog law was passed, which it is hoped will be done this session of the Legislature. Respectfully, X.

Washington's Birthday.

How It Was in the Olden Time.

Charlotte Observer.

Speaking of salaries, fees and retrenchment, a recurrance to the salaries paid our public officials in the earlier days of the State will be interesting just now. An almanac for the year 1844 is before us and suggests a comparison. At that time John M. Morehead was Governor of North Carolina and his salary was $2,000; that of his secretary was $300 and fees; the Secretary of State received $800 and fees; the Treasurer $1,500 and $500 for a clerk; the comptroller $1,000; the judges of the Supreme court—Ruffin, Gaston and Daniel—$2,500 each, and the judges of the Superior Court $1,750.

There is no questioning the fact that the salaries paid in 1844 commanded the services of just as able and upright men as those paid in 1878 How will the salaries proposed to be paid hereafter, under the Senate's retrenchment enactments, compare with those of 1844? The question turns upon the purchasing power of a dollar then and a dollar now. Money then was not very much more valuable than now, and it is safe to assume that we are as economical as our ancestors. To be this is, we suppose, the goal of the ambition of the most cast-iron retrencher.

Peter Cooper as an Inventer.

At a meeting of the Farmer's Club in Cooper Institute Tuesday, Robert B. Roosevelt urged the practicability fish raising, or "water farming." He was followed by the venerable Peter Cooper, who renewed the march of progress during his own life of 89 years. Beginning when New York city numbered 27,000 inhabitants, he recounted incident after incident, dwelling upon Fulton's application of steam and his own inventions, which brought into use water as a motive power, and the sending of ore in mines down descents with a chain. One of the first of his inventions, finally brought into practical use under other hands, was found to have been patented by him 53 years previous. In reply to a eulogistic speech by Mr. Ely, and other demonstrations of respect offered, Mr. Cooper gave a little sketch of his own life, in which he stated that at the age of 21 he had learned three trades. When the war with England broke out, having gained a patent for some machinery, he began accumulating the fortune which has been so freely and judiciously expended.

Raleigh, N. C.

Charlotte Democrat.

Fayetteville street, in Raleigh, is a disgrace and shame to the city authorities. The city of Raleigh is mainly supported by visitors from all parts of the State, in the way of Conventions, Legislatures, and people having business in the various State Departments. The mud on Fayetteville street is a disgrace to the Capital of the State, and if it is not removed and the street Macadamized, some one ought to indict the Aldermen of Raleigh. In the Summer time the main street of Raleigh is beclouded in dust, and in the Winter the black slosh and mud is intolerable. If something is not done by the city authorities to improve the streets a strong movement will soon be inaugurated to remove the "State House" from Raleigh to Greensboro, or High Point, or Charlotte, or Salisbury.

Even when the State Fair assembles in the dry Fall season, the city authorities will not spend a few dollars to sprinkle the Main street to keep down the dust. If the Capital is removed to Greensboro or Charlotte we will guarantee Macadamized streets and Street Sprinklers in dry weather. What say our Greensboro friends.

Retrenchment.

Western Reporter.

At the rate towards retrenchment at which the Legislature is now traveling it cannot possibly reach the goal by the 8th of next month. Indeed, we fear it would never get there. So much talk about retrenchment and so little work on the important measures which should be under consideration will defeat the object aimed at. The average legislator has too little courage to meet in a determined and manly way the influences which are brought to bear upon him by interested individuals when matters of the highest consideration to the people are under consideration. Cut down the salaries of officials generally with an unsparing hand. Apply the sickle of retrenchment upon the many tares that have grown up in our field of officials; the people in their wrath demand that they should be gathered in bundles and burned with unquenchable fire.

Reduce the salaries of almost all of the officials of the State, and we guarantee a sufficient number of place-seekers, even at half the present amounts to fill ten offices to where we have one. If those who now occupy the places can make more money somewhere else, they are at liberty to retire; others can and will fill the places to entire satisfaction.

All to the Lost Cause.

Savannah News.

Should the over-loyal and anxious radical patriot, so-called, see in Butler's remarks renewed danger to the country from a traitorous raid on the treasury, he can, on this point also, quiet his apprehensions. Southern maimed heroes do not expect government pensions. They gave their legs and arms, as they did their property, to the lost cause, and they do not look for compensation from the federal government therefor. Butler will not succeed in causing his record to be forgotten by his sudden magnanimity; neither will "rebel" pensions nor "rebel" claims ever be the means of increasing the burden or taxation.

How to Economise.

Charlotte Democrat.

If the Legislature wants to economize in State expenses and reduce taxes, it should curtail appropriations and expenses for the charitable State Institutions and stop appropriations of public money for the magnificent buildings at Morganton and Goldsboro, and other extravagant public works, including the Western N. C. Railroad. There is where the money of the State goes and not so much for salaries of State officers.

Vegetine

FOR

CHILLS, SHAKES,

FEVER AND AGUE.

TARBORO, N. C., 1878.

DR. H. R. STEVENS:—

Dear Sir,—I feel very grateful for what your valuable medicine, Vegetine, has done in my family. I wish to express my thanks by informing you of the wonderful cure of my son; also, to let you know that Vegetine is the best medicine I ever saw for Chills, Shakes, Fever and Ague. My son was sick with measles in 1873, which left him with Hip-joint disease. My son suffered a great deal of pain, all of the time; the pain was so great he did nothing but cry. The doctors did not help him a particle, he could not lift his foot from the floor, he could not move without crutches. I read your advertisement in the "Louisville Courier-Journal," that Vegetine was a great Blood Purifier and Blood Food. I tried one bottle, which was a great benefit. He kept on with the medicine, gradually gaining. He has taken eighteen bottles in all, and he is completely restored to health, walks without crutches or cane. He is twenty years of age. I have a young son, fifteen years of age, who is subject to colds. Whenever he feels one coming on, he comes in, takes a dose of Vegetine and that is the last of the Chill. Vegetine leaves no bad effect upon the system like the most of the medicines recommended for Chills. I cheerfully recommend Vegetine for such complaints. I think it is the greatest medicine in the world.

Respectfully, MRS. J. W. LLOYD.

VEGETINE.—When the blood becomes lifeless and stagnant, either from change of weather or of climate, want of exercise, irregular diet, or from any other cause, the Vegetine will renew the blood, carry off the putrid humors, cleanse the stomach, regulate the bowels, and impart a tone of vigor to the whole body.

feb 13 tf W. C. McMACKIN,

Dread and despair fall upon the community when a terrible epidemic, like the cholera or yellow fever, suddenly desolates our homes; yet, all the while, more insidious, but no less fatal foe, enters thousands of households every year and carries off the flower of the family in the early flush of manly youth and budding womanhood. People call it presumption, or "decline." It is not, in most cases, the hereditary phthisis or consumption of the lungs, which is the peculiar malady in climates like those of the British Islands and New England, but a general decay or arrest of the vital processes of nutrition. All the doctors agree that there is no remedy for this but COD LIVER OIL but they are constantly met by the insurmountable objection to the taste of the nauseous oil to swallow or retain it. This repulsion is entirely overcome by SCOTT'S EMULSION OF THE OIL with the HYPOPHOSPHITES OF LIME AND SODA which is agreeable to the taste and an unequaled nutrient and tonic for the body nerve and brain.

Unheard of Bargains!

AT THE INDEFATIGABLE ENDEAVORS TO PLEASE THE PUBLIC. SO HERE GOES.

Ye muses nine, inspire my pen,
To sing of Fayetteville streeet, No 10,
who tries his best to please his friends
And in his labors never ends,
Bargains he'll give you when you call
For No. 10 is all and all.
Of other houses youhear them talk;
In Fayetteville street just take a walk
And only ask for No. 10,
Kept by the most ingenious of men,
And when his friends by chance drop in
Then forth he comes, Lord what a grin,
And to their wondering eyes displays
Such heaps of brackets and window shades.
His pictures are exposed to public view
And a variety of cord to suspend them too,
His looking glasses and toilet cases
Will help adornyour forms and faces;
Picture frames and mouldings too
In great variety, black, brown and blue.
His window cornices and lambrequios fine,
will make your rooms and parlor shine.
Perforated mottoes, and white holly baskets.
And every other sort of stuff,
Of which he hopes to have enough.
So now he bids your all adieu
And wishes a happy new year too.
And not forget

LIVER

This important organ weighs but about three pounds, and all the blood in a living person about three gallons) passes through it at least once every half hour, to have the bile and other impurities strained or filtered from it. Bile is the natural purgative of the bowels, and if the Liver becomes torpid it is not separated from the blood, but carried through the veins to all parts of the system, and in trying to escape through the pores of the skin, causes it to turn yellow or a dirty brown color. The stomach becomes disco ed, and Dyspepsia, Indigestion, Constipation, Headache, Biliousness, Jaundice, Chills, Malarial Fevers, Piles, Sick and Sour Stomach, and general debility follow. MERRELL'S HEPATINE, the great vegetable discovery for torpidity, causes the Liver to throw off from one to two ounces of bile each time the blood passes through it, as long as there is an excess of bile; and the effect of even a few doses upon yellow complexion or a brown dirty looking skin, will astonish all who try it—they being the first symptoms to disappear. The cure of all bilious diseases and Liver complaint is made certain by taking HEPATINE in accordance with directions. Headache is generally cured in twenty minutes, and no disease that arises from the Liver can exist if a fair trial is given.

No greater wrong can be done than to say that Consumption is incurable. GLOBE FLOWER COUGH SYRUP will cure it when all other means have failed. Also, Colds, Cough, Asthma, Bronchitis, and all diseases of the throat and lungs. Read the testimonials of the Hon. Alexander H. Stephens, Gov. Smith and Ex-Gov. Brown of Ga., Hon. Geo. Peabody, as well as those of other remarkable cures in our book, free to all at the drug stores, and be convinced that if you wish to be cured you can be by taking the GLOBE FLOWER COUGH SYRUP. BLOOD

Grave mistakes are made in the treatment of all diseases that arise from poison in the blood. Not one case of Scrofula, Syphilis, White Swelling, Ulcerous Sores and Skin Disease, in a thousand, is treated without the use of Mercury in some form. Mercury rots the bones, and the diseases it produces are worse than any other kind of blood or skin disease can be. DR. PEMBERTON'S STILLINGIA or QUEEN'S DELIGHT is the only medicine upon which a hope of recovery from Scrofula, Syphilis and Mercurial diseases is all stages, can be reasonably founded, and that will cure Cancer.

$10,000 will be paid by the proprietors if Mercury, or any ingredient not purely vegetable and harmless can be found in it.

Price by all Druggists $1.00.

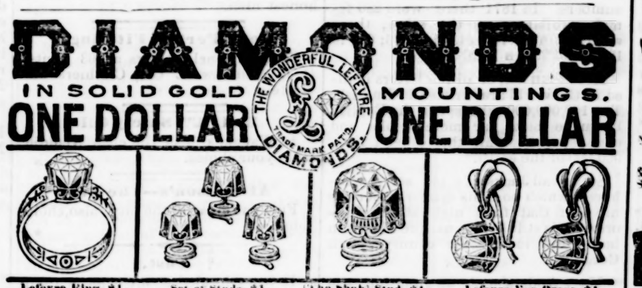
DIAMONDS

IN SOLID GOLD MOUNTINGS.
ONE DOLLAR — THE WONDERFUL LEFEVRE DIAMONDS — ONE DOLLAR



Lefevre Ring, $1. Set of Studs, $1. The Shah Stud, $1. Lefevre Ear Drops, $1.

THE ONLY PERFECT FAC-SIMILE OF THE REAL DIAMOND IN THE WORLD.

Pronounced by the Academy of France that *M. Lefevre has really obtained artificially the true diamond.* The basis of these gems are pure crystals found in the Sierra Nevadas, from whence they are exported to the Lefevre Laboratory in Paris, France, where they are submitted to a chemic and voltaic process, BY WHICH THEIR SURFACES ARE COVERED WITH A COATING OF PURE DIAMONDS, imparting to them all the BRILLIANCY, HARDNESS, and refractive qualities of the natural diamond, and making them as desirable for Wear, Brilliancy, and Beauty, as the veritable gems themselves. The Ring, Studs, and Ear Drops, as displayed in this announcement, are accurate engravings of SOLID GOLD MOUNTINGS, CONTAINING THE WONDERFUL LEFEVRE DIAMOND, warranted by certificate U. S. Mint assay.

ON RECEIPT OF ONE DOLLAR in America, either article as above represented. On "Book on Diamonds," with illustrations of artistic Diamond Jewelry in solid (14 k.) gold, mailed free.

I have seen many imitations of diamonds, but never any that could equal the Lefevre Brilliant.—M. ELLROY, Stamford, Conn.
I am in receipt of a pair of the Wonderful Lefevre Ear Drops, for one dollar; to say that I am pleased with them hardly fills the bill, they are simply elegant.—ANDREW MORRIS, Hendrickville, N. Y.
The Wonderful Lefevre Diamond Ring, for one dollar, came to hand this morning. It is really elegant, giving entire satisfaction, and eliciting wonder and admiration from all who see it.—W. H. REEDY, Martinsburg, W. Va.
The Lefevre Diamonds, mounted in solid gold, are truly marvelous.—P. F. AVERY & SONS, Home and Farm, Louisville, Ky.
The eminently successful experiments of M. Lefevre silences all doubt of the artificial reproduction of the true diamond.—M. DE FRENOY, the great French Scientist.
The Lefevre Diamond most effectually disturbs the slumbers of the possessors of costly gems.—Journal of Science.

☞ We guarantee the Wonderful Lefevre Diamonds for **One Dollar** to be mounted in **Solid Gold**, and will cheerfully refund the money if found unsatisfactory. Address all orders to the

Congress.

WASHINGTON, Feb. 22.—SENATE.—Ferry presented credentials from Hon. Zack Chandler, elected U. S. Senator from Michigan. The credentials were read and Chandler took the oath of office.

The Vice-President laid before the Senate a communication from the Post Master General in regard to the bill recently passed fixing the pay of letter carriers. He states that in addition to the estimates of 200,000 for the pay of carriers during the next fiscal year $354,000 additional will be required under the new bill and that $71,000 additional will be required to pay their salaries during the remainder of the present fiscal year should this bill take effect upon its approval by the President. Referred to the committee on appropriations.

HOUSE.—An effort to proceed to the consideration of the legislative appropriation bill voted down by the advocates of the tobacco bill and the bill to restrict the immigration of Chinese who desired to have the morning hour in order thereafter to move to go to business on the speaker's table and the House is now proceeding with the regular business of the morning hour.

The House by a non party vote of 187, years 164 nays has laid upon the table a bill reported from the committee on war claims, reimbursing Maggie Barron and others of Tennessee for supplies taken by the Union army during the war.

Foreign News.

LONDON, Feb. 22.—The Post's Berlin correspondent says: "The Chinese Government have purchased the machinery and line, engaged engineers and spinners in Germany to establish Cotton Mills in China so as to free that country from dependence upon English and Russian imports."

Marquis D Harcourt retiring French Ambasador at London, will go to Windsor to-day to take leave of the Queen. A report that Admiral Pothnan will succeed him, is confirmed. M. Teissereuce DeBork will go to Vienna as French Ambassador.

There is no apparent reason to credit the rumor of the resignation of M. De Marcere, Frence Minister of Interior, which originated in Statements in unofficial Paris newspapers yesterday afternoon, that M. De Marcere will not hold his usual Tuesday reception.

A Prize Fight Broke Up.

NEW YORK, Feb. 22.—A prize fight with hard gloves at Brevoort Hall last night between Mike Coburn and "Sprinhill Dick" lasted until one this morning, when forty-three rounds had been fought. At that hour the police broke into the room and arrested the whole party, including several prominent citizens. "Springhll Dick" was badly punished, while Coburn was but little hurt. The fight will be declared a draw and stake money will be divided. At the police court all the parties were discharged, except the principals who were held in 100 dollars bail, each.

Claims of Georgia.

WASHINGTON, Feb. 22.—The 72,000 dollars that Georgia claims to be included in the sundry civil appropriation bill is for a balance due the State for the removal of the Seminole Indians and not for the advances made during the war 1812 as previous stated. It has been approved by the treasury dept.

The amiable gentleman in the white house means well, but he bit off a big piece of reform for one lone man to masticate—especially, the malicious Democrats would say, with John Sherman for his cabinet leader.

Zachariah Chandler.

"I predict, my fellow citizens, that whether you nominate for your standard bearer in 1880 the man who they didn't love and did hate and yet fear—U. S. Grant [prolonged applausa]—or whether you nominate the gallant standard-bearer, Blaine, of Maine [great applause]—or whether you nominate John Sherman, the present secretary [mild applause]—that you and I will march shoulder to should r to rescue from the grasp of the rebel generals and rebel brigadiers the capital of t e nation'."

Heating Cities by Steam.

Washington Star.

The project of heating cities by steam, which has found many advocates, has come up not only in New York, where the necessary authority for the laying of pipes has been given, but in cities farther south. Movements in the direction of introducing such a system have been made in this this city and in Baltimore. It will be time enough for Washington or other cities to introduce the system after the experiment which has been authorized in New York has been tried and proved successful. Hitherto only limited areas, compared with that of a large city, have been heated by steam.

Mr. Evarts as a Paragrapher.

New York World.

One of the neatest things recently said in Washington, where neat things are neither said nor done as often as could be wished, was said by Secretary Evarts at a dinner the other night in reply to somebody who happened to be reading one of the regulation jokes about the Secretary's endless sentences, and gracefully repeated it. "Oh, nonsense," said Mr. Evarts, good-naturedly; 'I don't object to that sort of thing at all. People who expect to injure me by calling attention to my long sentences forget that the only persons really opposed to long sentences in this country are the criminal classes who deserve them."

The coffee was captured in bags from the Turks in their second siege of the city in 1683, and in that year the first cafe was started.

How the Road Agents of the Northwest Do Their Work.

Col. Rice, bayonet inventor, of Fort Keogh, and Lieut. Sibley and Morris Cohn, of Evansville, Ind., were waylaid by road agents on the Yellowstone. The officers were robbed of $200 and Cohn of $2,500. They were in an ambulance with an orderly and driver. As they descended into a sharp cut ravine four men with masks and cocked rifles popped up and commanded a halt, and shouted, "Throw up your hands." Lieut. Sibley undertook to raise his rifle, but was stopped by an allusion to the top of his head going off. The victims crawled out and stood up in a row, with a suggestive Winchester staring at them. While their pockets were being emptied an escort of five men, who were strolling behind, came up, and were accorded a similar reception. One soldier had seven cents, and the robbers took them. After the robbers had seen the party they disappeared. A detachment was detailed to hunt the highwaymen, and one of the number, Wm. Dixon, has been captured.

RULES FOR LENT.

Archbishop Wood's Circular Concerning the Observance of the Season.

The most Rev. Archbishop Wood has just issued the following rules for the observance of Lent, the first day of which, Ash Wednesday falls this year upon the twenty-sixth of the present month:

All the faithful who have completed their twenty-first year are bound to observe the Fast of Lent, unless dispensed for legitimate reasons.

One meal a day only is allowed, except on Sundays.

This meal is not to be taken until about noon.

On those days on which permission is granted to eat meat, both meat and fish are not to be used at the same meal, even by way of condiment.

A collation or partial meal is allowed in the evening. The general practice of pious Christians limits its quantity to the fourth part of an ordinary meal.

Bread, butter, cheese, fruit of all kinds, salads, vegetables and fish are permitted at the collation. Milk and eggs are prohibited.

Custom has made it lawful to drink in the morning some warm liquid, such as tea and coffee, or thin chocolate made with water.

Necessity and custom have authorized the use of lard instead of butter in preparing fish, vegetables, etc.

The following persons are not bound to observe the Fast, viz: All under twenty-one years of age; the sick; pregnant women and those giving suck to infants; those who are obliged to do hard work, and all who, through weakness, cannot fast without injury to their health.

By dispensation, the use of flesh meat will be allowed at any time on Sundays, and once a day on Mondays, Tuesdays, Thursdays and Saturdays, with the exception of Holy Thursday and the second and last Saturdays of Lent.

Persons exempted from the obligation of fasting by age or laborous occupation are not restricted to the use of meat at one meal only on those days on which its use is granted by dispensation. Others dispensed from the fast for other causes, as well as those who are obliged to fast, are permitted to use meat only at one meal.

"Keep 'way from dat nigger, I tell you," said Unclue Rube to his sable daughter, "keep 'way from him. He's like what de 'Postle John lived on in de wild'nes." "How's dat?" she asked, 'Low cuss, an' wild honey," replied Uncle Rube.

To the Readers of this Paper.

Most of you are familiar with our "Bible Propositions" which have been published in this paper for over two months. We are glad to know, that several hundred of you have already availed yourselves of its benefits, and realized, to some exteat, the wonderful virtues of the "Seven Springs Mass." Being induced to try it on account of the fairness of the proposition. We fully expected some few would demand the "Prize." Thus far not one has put in a claim. On the contrary, we have been the recipients of "Bibles," and other tokens of appreciation expressive of gratitude and acknowledgments for having called their attention to the remedy.

Our object for making that offer, was not merely to relieve headaches, for that which many regard as a case of headache, is in reality only a symptom of more serious and complicated diseases, it was therefore, more to reach these complaints, (the names of which we dislike to publish in news papers.) Knowing if the Mass was properly used for headache, the patient would discover its great value for other diseases, and we are glad to say, the plan has succeeded well, as evidenced from hundreds of correspondents, and the rapidly increasing demand for the Mass—and is being sold by all Druggists.
